Deceleration Alert Light

The TruckAlert® deceleration light is a motion sensing LED warning lamp that operates independently from the vehicle's braking system. TruckAlert® continuously monitors velocity and will activate when a reduction in forward velocity occurs, including deployment of your Jake Brake.

TruckAlert® will help prevent costly down time from collisions due to the many distracted drivers we share the roadways with.

TruckAlert® is constructed of UV stabilized polycarbonate and hermetically sealed with an Ingress Protection rating of IP67 so it's suitable for use in even the harshest environments.

Manufactured by TOMAR Electronics Inc.

MADE IN USA
