## Deceleration Alert Light

The TowAlert™ deceleration light is a motion sensing LED warning lamp that operates independently from the vehicle's braking system. TowAlert™ continuously monitors velocity and will activate when a reduction in forward velocity occurs.

TowAlert™ will help protect your valuable cargo from "TEXTING" drivers or other distractions so commonly found on the roadways we share. It turns any trailer into a SMART Trailer, automatically protecting you from mishaps.

TowAlert™ is commercial grade, designed to provide years of protection in the harshest environments. Manufactured in the USA to the highest standards, backed by a 5 year replacement warranty. Protect what you Tow, your cargo is always precious!

MADE IN USA
